Technologies

Languages: Python, C++, JavaScript, TypeScript, SQL

Technologies: AWS, FastAPI, Node.js, Express.js, React.js, Next.js, REST APIs, WebSockets, SQLAlchemy, asyncpg

Databases: PostgreSQL, TimescaleDB, ClickHouse, Redis, DuckDB

Data: Pandas, NumPy, Polars, TA-Lib, vectorbt

Trading: CCXT, Delta Exchange API, Algorithmic Trading, Backtesting

DevOps & AI Tooling: Docker, AWS EC2, AWS S3, Linux, Nginx, Nuster, Kafka, Git, Bitbucket (CI/CD), Claude Code, AI-assisted development

Experience

Software Engineer, Kalpi.ai – Backed by Rainmatter by Zerodha

Jun 2025 – Aug 2026

Hyderabad, Telangana, India

Remote

- **Portfolio Analytics & Platform (Python/FastAPI)**
 - Developed major backend and frontend components of Kalpi's portfolio platform from **0 to 1**, covering portfolio analytics, holdings, and investment workflows.
 - Engineered portfolio analytics using **FastAPI, PostgreSQL, Redis, and ClickHouse** for financial data and portfolio calculations.
- **Broker Integrations & Trading (Python/WebSockets)**
 - Integrated broker **REST and WebSocket APIs** for real-time market data, portfolio synchronization, order management, and trading operations.
 - Implemented the **stock buy executor** and automated portfolio order workflows for investment decisions.
- **Scraping & Financial Data Pipelines (Python)**
 - Automated pipelines for **symbols, fundamentals, prices, and historical market data**, reducing manual data collection effort by **90%**.
 - Processed and integrated financial datasets into downstream ranking, analytics, and portfolio workflows.
- **Strategy Builder (React/Next.js/React Flow)**
 - Developed the visual **strategy builder** using React, Next.js, and React Flow for configuring investment and trading strategies.
 - Connected frontend strategy workflows with backend investment and execution services.
- **Stock Ranking System (Python/Data)**
 - Designed the **stock ranking system** using quantitative signals, financial data, and portfolio metrics.
 - Integrated ranking outputs and calculated metrics into portfolio analysis workflows.
- **Portfolio Rebalancing (Python/FastAPI)**
 - Designed the **portfolio rebalancing system** covering target allocation, scheduling, portfolio changes, and execution workflows.
 - Implemented recurring rebalance scheduling and reminder logic across different investment cadences.
- **Performance & Infrastructure**
 - Engineered ClickHouse time-series analytics for **millions of records** with **sub-50ms queries**.
 - Optimized Redis caching to a **70% hit rate**, reducing latency from **180ms to 60ms**, and deployed services on **AWS EC2**.

Software Engineer Intern, Kalpi.ai

Jun 2025 – Nov 2025

Remote

- Developed initial **Python/FastAPI** services, integrated broker APIs and WebSockets, and worked with PostgreSQL, Redis, and ClickHouse.
- Automated symbol and historical-price pipelines and contributed to production portfolio workflows through API development, debugging, and optimization.

Projects

CrypAlgos – Algorithmic Trading Platform

[Live](#)

- **Visual Strategy Builder**
 - Created a no-code algorithmic trading interface using a visual **React Flow** strategy builder with data, indicators, conditions, and actions.
- **Strategy Compiler**
 - Designed a compiler translating visual strategy graphs into executable **Python strategy classes** running on a common execution engine.
- **Backtesting & Execution Engine**
 - Engineered an event-driven backtesting engine supporting **futures/perpetuals**, position management, risk controls, and trade execution.
- **Market Data & Exchange Integration**
 - Developed real-time market-data infrastructure using **Python, WebSockets, ClickHouse, and Redis**; integrated **Delta Exchange** for market data and live order execution.
- **Strategy Replay**
 - Implemented strategy replay allowing users to inspect candles, indicators, conditions, and executed trades during backtests.
- **Risk & Execution Model**
 - Designed position sizing and exit workflows with stop-loss, take-profit, and trailing-stop risk controls.

Education

Shri Vaishnav Institute of Management & Science

2021 – 2025

Bachelor of Computer Applications (BCA) – Indore, India

Kendriya Vidyalaya Betul

2019 – 2021

Senior Secondary (PCM) – Betul, India
